

Exercises - Session 15

In case you get stuck anywhere, don't be afraid to ask the coaches! They are here to help and will gladly explain everything to you!

Take notes during the exercises. Even if you never look at them again, they will help you memorise things!

20min CLI

In this exercise, we are going to implement a little program that prints the news of the various news areas from 20 Minuten. Open the link to the following repository and implement the missing code:

<https://github.com/rubymonstas-zurich/20min-cli>
